

Loft Conversion Product Selection

Alumaflex® insulation is a sophisticated multi layer radiant barrier of low emissivity. Alumaflex® is effective in winter by reflecting heat back into the building and deals with all forms of energy transfer (radiation, conduction and convection).

BENEFITS

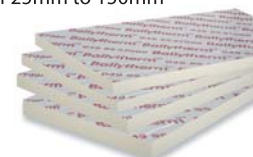

- Available in 1.5m x 10m rolls
- LABC system approval
- Quick and easy to install
- Improved air tightness
- Reduced cold bridging
- Ideal for loft and barn conversions
- Compatible with all IPP products
- Warm in winter, cool in summer

Ballytherm Insulation is a foil-faced Polyisocyanurate (PIR) insulation board used in floors, cavities and roofs. The PIR board is formed by a continuous foaming process which gives the board its tight cell structure and bonds the facing to the foam.

BENEFITS

- Available in 1200mm x 2400mm and 1200mm x 4500mm
- Produced with zero ozone depletion blowing agent
- Low thermal conductivity (0.022 W/mk)
- Lightweight and easy to handle
- Suitable for a wide variety of floor constructions
- Low emissivity foils
- Available in increments of 25mm to 150mm
- BBA approved

Alumaflex® Breather Membrane is a three layer laminate, comprising of two UV stabilised, spun bonded layers and a UV stabilised film which is highly breathable whilst maintaining excellent water hold out properties.

BENEFITS

- Suitable for warm roof and cold roof construction
- Highly vapour permeable, but entirely watertight
- Can be used as a temporary roof covering
- Easy to cut and lightweight to handle
- Available in 1m and 1.5m x 50m rolls
- Helps to avoid condensation risk
- UV and heat resistant
